Portfolio

Barcelona, Spain

About me

Passionate about IT and cybersecurity, I enjoy exploring the potential of the Linux terminal and bash scripting. I love taking on challenges on platforms like Hack The Box and participating in CTFs. I'm always looking for ways to learn and improve my skills.

Languages

English – Conversational

Spanish – Native

Catalan – Native

Skills

Networks

Network configuration and creation of VLANs and routers (RIPv, RIPv2, OSPF)

Windows Server

Active Directory | GPOs | Samba

Programming Languages

Python | Bash scripting

Other

Sage | Zendesk Jira | PostgreSQL | Sentinel One | SOPHOS | Greenbone | Splunk | Wazuh | AlientVault | Elastic Stack | Nessus | Acunetix | Cipherscoring

Work experience

Cybersecurity Analyst

2025

Fractalia

- Conduct vulnerability analyses and detect insecure configurations using tools such as Acunetix, Ciberescoring, and Nessus.
- Prepare technical reports with indicators of compromise (IoCs).
- Present technical reports to clients, clearly and concisely communicating key findings, ensuring they understand the identified vulnerabilities and the importance of the proposed corrective measures.

IT Technician

2024 – 2025

KAPALUA

- Design and manage the corporate hardware infrastructure.
- Define user profiles and access levels.
- Manage user registrations and deregistrations on systems.
- Configure equipment and make necessary modifications.
- Resolve daily issues and propose solutions for recurring problems.
- Create user guides and provide training.
- Develop a device renewal and upgrade plan.

Cybersecurity Analyst

2022 – 2024

NeXTreT

- Perform vulnerability scans and detect insecure configurations using Wazuh and complementary tools to strengthen security posture.
- Monitor security events with Elasticsearch, Splunk, and AlienVault, enabling proactive threat detection and correlation in SOC environments.
- Manage security incidents with EDR solutions such as SOPHOS and Sentinel One, applying containment, behavioral analysis, and endpoint remediation.

- Prepare weekly technical reports with indicators of compromise (IoCs), key forensic findings, and corrective actions for clients and security teams.

IT Support Technician

2021 – 2022

Inet Smart ITC

- Assembly and configuration of hardware, as well as installation of software and operating systems.
- Diagnosis and troubleshooting of computer equipment, including preventive and corrective maintenance.
- Technical assistance in problem resolution and training in the use of software and hardware.
- Installation and configuration of local area networks (LAN) and troubleshooting connectivity issues.

Education

Advanced Cybersecurity Course

2023

UNIR - International University of La Rioja 

Higher Grade in Formation Course ASIXc

2022

Institut Tecnològic de Barcelona 

Certificates

- Cisco Ethical Hacker
